

TEXAS WATER RESOURCES INSTITUTE

Statewide Bacterial Source Tracking Program for FYs 2013-2014  
FY 2013 Workplan 13-50

Quarter no. 4 From 9/1/13 Through 11/30/13

**I. Abstract**

With approval of the QAPP in August 2013, work on fecal collection in the Leon and San Antonio watersheds was completed. Of the 100 source samples collected from these watersheds, 96 were positive for *E. coli*. 478 isolates have been archived and 288 isolates have been prepared for ERIC-PCR. The ERIC-RP data for 201 *E. coli* known source isolates from the Leona River watershed were analyzed and included in the library. The Texas *E. coli* BST Library was updated (now ver. 6-13) and includes 77 isolates from the Leona River watershed. Outreach regarding BST was expanded this quarter and included (1) discussions between UTSPHEP and UTSPH faculty in Houston regarding assisting the City of Houston, and AgriLife SCSC and East Texas Baptist University, (2) 77 visits to the website by 55 unique visitors, (3) distributed educational brochures to participants of the Texas Watershed Planning Short Course, and (4) delivered a seminar on the use of BST in watershed planning efforts to students in the WMHS-685. All work on distributing the barriers to BMP adoption survey packet was completed by USDA-NASS. Finally, Parsons initiated work to address EPA comments on the Leon River WPP.

**II. Overall Progress and Results by Task**

**Task 1 Project Administration**

*Subtask 1.1 TWRI will prepare electronic quarterly progress reports (QPRs) for submission to the TSSWCB. QPRs shall document all activities performed within a quarter and shall be submitted by the 15th of March, June, September and December. QPRs shall be distributed to all project partners and posted on the project website.*

The following actions have been completed during this reporting period:

- a. The fourth quarterly progress report was submitted on November 13, 2013.

**50% Complete**

*Subtask 1.2 TWRI will perform accounting functions for project funds and will submit appropriate Reimbursement Forms to TSSWCB at least quarterly.*

The following actions have been completed during this reporting period:

- a. To date, \$126,397 or 28% of project funds had been expended.

**28% Complete**

*Subtask 1.3 TWRI will host coordination meetings or conference calls with the TSSWCB, UTSPHEP and AgriLife SCSC, at least quarterly, to discuss project activities, project schedule, communication needs,*

*deliverables, and other requirements. TWRI will develop lists of action items needed following each project coordination meeting and distribute to project personnel.*

The following actions have been completed during this reporting period:

- a. On September 30 and December 3, 2013, coordination meetings were held UTSPHEP, TWRI, IRNR, and AgriLife SCSC to discuss fecal sample collection.
- b. On October 4 and November 12, 2013, TWRI met with Parsons to coordinate Leon WPP efforts.
- c. On November 22, 2013, TWRI and AgriLife SCSC met to discuss current and future BST efforts.

**50% Complete**

*Subtask 1.4 TWRI will work with AgriLife SCSC and UTSPHEP to develop a Final Report that summarizes activities completed, conclusions reached during the project, and the extent to which project goals and measures of success have been achieved.*

The following actions have been completed during this reporting period:

- a. No activity to report this quarter.

**0% Complete**

## **Task 2 Quality Assurance**

*Subtask 2.1 TWRI will work with UTSPHEP, AgriLife SCSC and IRNR to develop a QAPP for activities in Tasks 3 and 4 EPA Requirements for Quality Assurance Project Plans (QA/R-5) (May 2006) and the TSSWCB Environmental Data Quality Management Plan (August 2007).*

The following actions have been completed during this reporting period:

- a. The QAPP was approved by the TSSWCB on August 5, 2013.

**100% Complete**

*Subtask 2.2 TWRI will submit revisions and necessary amendments to the QAPPs as needed.*

The following actions have been completed during this reporting period:

- a. No activity to report this quarter.

**0% Complete**

*Subtask 2.3 AgriLife SCSC and UTSPHEP will maintain and update, at least annually, the 7 statewide BST template-SOPs for collection of fecal samples for BST, isolation of E. coli, archival of E. coli isolates, ERIC-PCR, RP, pre-processing of water samples for Bacteroidales PCR, and Bacteroidales PCR consistent with EPA Guidance for Preparing Standard Operating Procedures (SOPs) (QA/G-6) and the TSSWCB Environmental Data Quality Management Plan so that they include the most recent advances in BST science, methodologies, markers and technologies.*

The following actions have been completed during this reporting period:

- a. A conference call was held on November 20, 2013 between AgriLife SCSC and UTSPHEP to discuss SOPs.

**5% Complete**

*Subtask 2.4 AgriLife SCSC and UTSPHEP will coordinate to ensure that needed personnel training is kept on par between the groups to ensure congruity statewide.*

The following actions have been completed during this reporting period:

- a. Continued discussions this quarter between AgriLife SCSC and UTSPHEP personnel regarding BST procedures, results, and reports.

**20% Complete**

*Subtask 2.5 UTSPHEP and AgriLife SCSC will work with public and private laboratories across the state which are exploring the use of BST. UTSPHEP and AgriLife SCSC will work to ensure that methodologies and QA/QC mechanisms adopted by these other laboratories are as congruent as possible with SOPs utilized by UTSPHEP and AgriLife SCSC (subtask 2.1)*

The following actions have been completed during this reporting period:

- a. UTSPHEP and the City of Houston initiated discussions regarding BST and have a meeting planned for December, 2013.
- b. AgriLife SCSC provided BST SOPs and equipment lists to faculty at East Texas Baptist University who were interested in conducting BST work.

**30% Complete**

### **Task 3 Known Source Fecal Sample Collection**

*Subtask 3.1 TWRI will work with IRNR to collect known source fecal samples.*

The following actions have been completed during this reporting period:

- a. IRNR collected 100 known source fecal samples (75 from the San Antonio and 25 from the Leon) and shipped them to UTSPHEP for isolation and analysis. See attached list of fecal samples collected.

**100% Complete**

*Subtask 3.2 TWRI and IRNR will work with UTSPHEP and AgriLife SCSC to develop a targeted list of needed species/watersheds for fecal sample collection and plan for their collection and delivery. This list should primarily fill gaps in the Texas E. coli BST Library identified in other TSSWCB-funded BST projects. Targeted species will include small mammals such as mice, squirrels, nutria and rabbits. In addition, samples will be collected from at least one previously studied watershed (e.g., Leon River) in order to determine the temporal stability of the Texas E. coli BST Library. Approximately 50 known source fecal samples from each of 2 watersheds (Leon and San Antonio Rivers) are budgeted for collection (total of 100 samples).*

The following actions have been completed during this reporting period:

- a. A targeted list of needed species/watersheds for fecal sample collection was developed and provided to IRNR to guide collection (see QPR3 for the list).

**100% Complete**

*Subtask 3.3 IRNR will collect fecal samples in accordance with the plan developed in Subtask 3.2 and work closely with UTSPHEP and AgriLife SCSC to coordinate delivery of the samples to the appropriate lab. IRNR will communicate with a select group of organizations, agencies and businesses in each of the 2 targeted watersheds to arrange and resolve any access concerns and gather input to improve geographic targeting of sample collection. Travel plans, scheduling and routing maps will be prepared prior to deploying the field crew. IRNR will deploy the field crew to collect known source samples from each targeted watershed. IRNR will coordinate closely with UTSPHEP and AgriLife SCSC to ensure sample delivery adheres to established QA/QC procedures. A known source sample data set will be finalized after completion of the field work and submitted to TWRI.*

The following actions have been completed during this reporting period:

- b. IRNR collected 100 known source fecal samples (75 from the San Antonio and 25 from the Leon) and shipped them to UTSPHEP for isolation and analysis. See attached list of fecal samples collected.

**100% Complete**

#### **Task 4 Analytical Laboratory Capacity, Library Expansion and Methods Development**

*Subtask 4.1 UTSPHEP and AgriLife SCSC will maintain BST analytical equipment (e.g., RiboPrinter) and general laboratory equipment. This includes securing maintenance contracts, replacement parts and expendable supplies and purchase of a new computer for the UTSPHEP RiboPrinter system.*

The following actions have been completed during this reporting period:

- a. UTSPHEP and AgriLife SCSC continuously maintain BST analytical equipment and general laboratory equipment.
- b. A new computer for the UTSPH-EP RiboPrinter system was purchased, received, installed and tested in July of this quarter.
- c. The UTSPHEP purchase agreement for RiboPrinter consumables has been completed.

**80% Complete**

*Subtask 4.2 UTSPHEP will retain (or hire) a Graduate Student or Postdoctoral Research Associate that will 1) maintain laboratory operating capacities and technical expertise to conduct BST studies across the state, 2) aid in the evaluation, expansion and maintenance of the Texas E. coli BST Library, 3) evaluate library-independent methods and markers, and 4) provide support of TSSWCB project 12-10 BST to Support Adaptive Management of the Arroyo Colorado WPP.*

The following actions have been completed during this reporting period:

- a. UTSPHEP has retained Joy Truesdale and Elizabeth Casarez to 1) maintain laboratory operating capacities and technical expertise, 2) aid in the evaluation, expansion and maintenance of the Texas E. coli BST Library, 3) evaluate library-independent methods and

markers, and 4) provide support of TSSWCB projects. One graduate student, Cesar Navar, was hired part-time and is being trained.

**100% Complete**

*Subtask 4.3 AgriLife SCSC will retain (or hire) Graduate Students and/or a Postdoctoral Research Associate that will 1) maintain laboratory operating capacities and technical expertise to conduct BST studies across the state, 2) continue BST efforts in support of TSSWCB projects 09-10 Development of a WPP for Attoyac Bayou, 11-50 Assessment of Water Quality and Watershed Planning for the Leona River and 11-51 Instream Bacteria Influences from Bird and Bat Habitation of Bridges, and 3) evaluate new poultry marker(s) for library-independent BST.*

The following actions have been completed during this reporting period:

- a. AgriLife SCSC advertised a postdoc position in November with a tentative starting date of December 2013. The new postdoc will be trained by Emily Martin and ultimately assume leadership of SCSC BST projects.

**100% Complete**

*Subtask 4.4 UTSPHEP and AgriLife SCSC will expand the statewide E. coli BST library through the analysis of ERIC-RP data provided by AgriLife SCSC for approximately 100 E. coli known source isolates obtained from the Leona River watershed (TSSWCB Project 11-50). Additionally, UTSPHEP and AgriLife SCSC will isolate E. coli from approximately 100 known source fecal samples collected through Task 3, which should primarily fill gaps in the library identified in other TSSWCB-funded BST projects. Approximately three isolates from each fecal sample (for a total of approx. 300 isolates) will be analyzed using ERIC-PCR for inclusion in the Texas E. coli BST Library; based on the ERIC-PCR fingerprint patterns, approximately half of the isolates (150) will be further analyzed using RP for inclusion in the Texas E. coli BST Library. UTSPHEP and AgriLife SCSC will equitably split workload. AgriLife SCSC will also fingerprint (ERIC-RP) and analyze 20 known-source E. coli isolates collected as part of TSSWCB Project 11-51.*

The following actions have been completed during this reporting period:

- a. The ERIC-RP data for 201 (more than twice the stated deliverable) *E. coli* known source isolates from the Leona River watershed were analyzed and included in its local library. 94 of these isolates were self-validated for inclusion in the Texas *E. coli* BST Library. After screening with serial jackknife analysis for cosmopolitan strains, the Texas *E. coli* BST Library was updated (now ver. 6-13) and includes 77 isolates from the Leona River watershed.
- b. Of the 100 source samples collected from the San Antonio and Leon watersheds, 96 were positive for *E. coli*. 478 isolates have been archived and 288 isolates have been prepared for ERIC-PCR.
- c. UTSPHEP analyzed two sets of water *E. coli* ERIC-RP fingerprints for AgriLife SCSC to assist in their service work for the San Antonio River Authority and Guadalupe-Blanco River Authority.

**60% Complete**

*Subtask 4.5 UTSPHEP and AgriLife SCSC will collaborate to evaluate the geographical and temporal stability, composition, average rates of correct classification (accuracy), diversity of source specific isolates, and further development and refinement needs of the Texas E. coli BST library.*

The following actions have been completed during this reporting period:

- a. The composition and average rates of correct classification for the Texas *E. coli* BST Library have been updated after the inclusion of the isolates from the Leona River watershed and screening for cosmopolitan strains using serial jackknife analysis.
- b. UTSPHEP and AgriLife SCSC discussed the classification of feral hogs as a source class on Nov 20, 2013.

**30% Complete**

*Subtask 4.6 Using known source fecal material, AgriLife SCSC and UTSPHEP will utilize the best available bacterial indicators to evaluate and further develop/refine source-specific bacterial PCR markers. Specifically, efforts will be made on markers to 1) identify poultry litter/manure pollution, 2) evaluate the use of genetic targets based on ERIC-PCR products to differentiate human and animal derived E. coli, 3) differentiate between domestic swine and feral hogs, 4) differentiate deer from other ruminants by continued analysis of existing data on deer fecal microbial communities, and 5) evaluate the occurrence of human HF183 marker cross reactivity for all 100 known source animal samples collected under Task 3.*

The following actions have been completed during this reporting period:

- a. UTSPHEP has analyzed 17 of the 100 known source fecal samples from Task 3 for the HF183 marker.

**5% Complete**

*Subtask 4.7 AgriLife SCSC and UTSPHEP will cooperate with other entities nationwide to ensure that the most up-to-date and accurate BST approaches are implemented in Texas by attending and participating in BST-related meetings, seminars and workshops, as appropriate, to learn of new and improved BST methods being employed elsewhere.*

The following actions have been completed during this reporting period:

- a. UTSPHEP has been collaborating with a group of BST investigators across the US to address the possibility of deer fecal contamination resulting in HF183 *Bacteroidales* human marker false positive results.

**25% Complete**

**Task 5 Outreach on Bacterial Source Tracking and BMPs**

*Subtask 5.1 TWRI will host and maintain the <http://texasbst.tamu.edu> website to disseminate educational materials, project updates, science updates, notify readers about educational opportunities, and other outreach efforts to advance the science and application of BST in Texas and nationally.*

The following actions have been completed during this reporting period:

- a. TWRI continues to host and maintain the Texas BST Library website. This quarter, the website was updated to include the latest information on this project.
- b. Between September 1, 2013 and November 30, 2013, there were 77 visits to the website by 55 unique visitors.

- c. Since project inception in October 1, 2012, there have been 539 visits to the website by 372 unique visitors.

**50% Complete**

*Subtask 5.2 TWRI, UTSPHEP, and AgriLife SCSC will periodically meet with natural resource agencies, including but not limited to USEPA-R6, TCEQ, TPWD, TDA, GLO, DSHS, and selected river authorities, to advance the general knowledge and understanding of agency staff on BST and to develop action strategies to address issues raised by agency staff regarding the use of BST in Texas.*

The following actions have been completed during this reporting period:

- a. On August 21, 2013, UTSPHEP presented “Waterborne Pathogen Research to Support Water Quality Regulations” to EPA Region 6 and other participants of the EPA webinar.

**50% Complete**

*Subtask 5.3 TWRI, UTSPHEP, and AgriLife SCSC will distribute the educational brochures developed through TSSWCB Project 10-50 (subtask 4.2). TWRI, UTSPHEP, and AgriLife SCSC will develop additional flyers, one-pagers, tri-folds or other appropriate printed media, as needed, that can be used to 1) discuss the appropriate application of BST in identifying fecal contamination sources, and 2) promote the analytical laboratory capability of public BST labs which the State has invested. As appropriate, TWRI will include information about BST in general, and this project specifically, in the txH2O magazine, the Conservation Matters e-mail newsletter and AgriLife Today news.*

The following actions have been completed during this reporting period:

- a. TWRI distributed educational brochures to participants of the Texas Watershed Planning Short Course held November 4-8.

**20% Complete**

*Subtask 5.4 TWRI, UTSPHEP, and AgriLife SCSC will promote the use of and provide resources on BST by participating in conferences, workshops, seminars and other appropriate venues, including but not limited to the 2013 and 2014 TCEQ Environmental Trade Fair, WEF/WEAT events in Texas, TSCRA/TFB/TWA annual conventions and ASABE events in Texas.*

The following actions have been completed during this reporting period:

- a. TWRI delivered a seminar on the use of BST in watershed planning efforts to students in the WMHS-685 Developing and Implementing Watershed Plans class at Texas A&M on September 30, 2013.
- b. TWRI plans to purchase a booth at the 2014 TCEQ Environmental Trade Fair.
- c. TWRI will present “Bacterial Source Tracking in Texas: A Retrospective Assessment of a Decade of Use in the Lone Star State” at the WEF/WEAT meeting on April 17, 2014.

**20% Complete**

*Subtask 5.5 TWRI, UTSPHEP and AgriLife SCSC will work to inform other researchers/academia who are engaged in BST in Texas (e.g., Edrington, Brinkmeyer, Alam, Ward) about the methods and approaches recommended by the Task Force and being implemented by the State.*

The following actions have been completed during this reporting period:

- a. UTSPHEP is collaborating with other UTSPH faculty in Houston who are interested in employing BST to assist the City of Houston. Dr. Brinkmeyer has done some work for Houston in the past and may be engaged in discussions at the discretion of Houston personnel.

**20% Complete**

*Subtask 5.6 To build on the success of the 2012 BST – State of the Science Conference, TWRI, UTSPHEP, and SCSC will evaluate the need for and timing of a follow-up conference. If the need is substantiated, TWRI, UTSPHEP and SCSC will initiate planning and logistics for a follow-up conference.*

The following actions have been completed during this reporting period:

- a. No activity to report this quarter.

**0% Complete**

*Subtask 5.7 With assistance from the USDA-NASS Texas Field Office, a stratified random sampling scheme will be implemented using a target population of beef cattle producers who completed 2012 Census of Agriculture forms. The sample will be stratified according to NASS district and beef cattle herd size. USDA-NASS will provide Texas A&M Department of Soil & Crop Sciences with a list of unique identifying numbers that will be placed on all survey materials so that response/non-response can be tracked. The USDA-NASS Texas Field Office will also assist with logistics related to compiling, stuffing, and mailing survey materials that will include an introductory postcard, the first survey packet with cover letter and survey instrument, a reminder postcard, and a second survey packet with cover letter and survey instrument. This information will support assessment of barriers to BMP adoption in conjunction with TSSWCB Project #12-08.*

The following actions have been completed during this reporting period:

- a. Data collection was ceased on November 1, 2013. Twenty postcards and/or survey packets were returned undeliverable, 16 individuals reported they had sold all of their cattle, and 46 individuals indicated they did not wish to participate in the study. This yielded a frame error of 4.8% and reduced the total sample to 1,618 beef cattle producers. A total of 90 surveys (5.6%) were completed online and 687 (42.5%) were completed on paper and mailed back to the student researcher for a total response rate of 48.1%. The completed surveys are currently being scanned by the Department of Agricultural Leadership, Education, and Communications at Texas A&M University. It is anticipated the data file will be ready for analysis by the second week of December. Data analysis and reporting of the results will continue through Spring 2014.

**100% Complete**

*Subtask 5.8 In order to reduce pollutant contributions to streams, including bacteria, TWRI will coordinate a Southwestern United States Stream Restoration Conference Workshop titled: Riparian Vegetation Workshop – Putting the ‘green’ into streambank stabilization in San Antonio in 2013.*

The following actions have been completed during this reporting period:

- a. The Southwest Stream Restoration Conference was held on May 28-30 at the Hyatt Regency in San Antonio, Texas. The conference was attended by more than 230 participants. The

Riparian Vegetation Workshop was held on the first day of the conference (May 28 from 1:30-5:00 pm). The Workshop was very well attended with more than 50 attendees participating. The conference agenda and presentations are available at [http://southweststream.org/?page\\_id=21](http://southweststream.org/?page_id=21).

- b. TWRI and TPWD will co-chair the program planning committee for the 2014 Southwestern Stream Restoration Conference.

**100% Complete**

### **Task 6 Technical Assistance for Leon River WPP Update**

*Subtask 6.1 Schedule and attend a meeting to gain input and support from the stakeholders on the strategies, proposed answers and rebuttals of the comments submitted by EPA. Also participate on planning conference calls as needed.*

The following actions have been completed during this reporting period:

- a. TWRI subcontract with Parsons was executed on October 24, 2013.
- b. Parsons initiated work to address EPA comments.
- c. Parsons arranged a meeting on November 12, 2013 to review draft responses and gather input from the project team and key stakeholders.
- d. Parsons assisted with organizing a meeting of the Leon WPP Steering Committee planned for December 18, 2013 to garner input from the broader committee prior to finalizing the response and submitting them to EPA.

**40% Complete**

*Subtask 6.2 PowerPoint presentation to stakeholders to summarize key issues of response to comments for discussion at stakeholder meeting.*

The following actions have been completed during this reporting period:

- a. Parsons initiated preparation of slides for a PowerPoint presentation to stakeholders summarizing key issues of response to comments for discussion at the December 18 stakeholder meeting.

**20% Complete**

### **III. Related Issues/Current Problems and Favorable of Unusual Developments**

- A 6 month no cost extension will be submitted next quarter to provide the time necessary to complete all project tasks.

### **IV. Projected Work for Next Quarter**

- Initiate analysis of known source fecal samples from Leon and San Antonio watersheds
- Purchase a booth at the 2014 TCEQ Environmental Trade Fair
- Meet with the Leon WPP Steering Committee on December 18, 2013 to garner input from the broader committee and finalize the response for submission to EPA
- UTSPHEP and the City of Houston meeting in December 2013 regarding initiating BST

## Known Source Fecal Samples Collected

10-22-2013 (29 Total Samples) Collected at Lackland AFB (Bexar Co.)

- 3 Raccoon
- 1 Skunk
- 1 Opossum
- 11 Wild Pig
- 13 Deer Mice

10-28-2013 (4 Total Samples) Collected at Lackland AFB (Bexar Co.)

- 2 Raccoon
- 1 Skunk
- 1 Opossum

10-29-2013 (13 Total Samples) Collected at Lackland AFB (Bexar Co.)

- 2 Raccoon
- 3 Skunk
- 3 Opossum
- 5 Wild Pig

10-30-2013 (11 Total Samples) Collected at Lackland AFB (Bexar Co.)

- 3 Raccoon
- 1 Rat
- 7 Opossum

11-7-2013 (18 Total Samples) Collected at Lackland AFB (Bexar Co.)

- 17 Deer
- 1 Raccoon

11-20-2013 (20 Total Samples) Collected in Coryell and Hamilton Counties

- 5 Raccoon
- 2 Skunk
- 1 W-T Deer
- 12 Domestic Goats

11-21-2013 (5 Total Samples) Collected in Coryell County

- 1 Domestic Rabbit
- 1 Domestic Goat
- 1 Cow
- 1 Horse
- 1 Dog
